

THE SUMMONS ANSWERED.

Rev. Henry Ward Beecher Dies in Brooklyn.

The World's Greatest Preacher Passes Quietly Away While Asleep—The Last Scene—Sketch of His Career.

New York, March 8.—Henry Ward Beecher died at 9:30 a. m. The patient began to sink slowly after midnight, and the watchers at his bedside soon saw that the end was near. Mr. Beecher passed quietly away while asleep. He never recovered consciousness after paralysis stupified his mind.

It is, of course, too early yet to announce anything definite about the funeral, but the interment will probably be in Greenwood. Mr. Beecher never bought a lot there, but his children and some of his grandchildren lie on Evergreen Hill on the plot of Mrs. John T. Howard. Mr. Beecher's twin babies died on the same day, when the afterwards famous preacher was young and poor and comparatively unknown.

Those present at the last moment were: Colonel H. B. Beecher, his three daughters, Hattie and Daisy, and son, Henry Ward Beecher, Miss Edith Beecher, W. S. Beecher and wife, Rev. Samuel Scoville, Mrs. S. Scoville, daughter of Rev. Henry Ward Beecher, Miss Scoville, who has just come home from the Pacific slope, Miss Hullard, the Rev. S. B. Halliday and wife, Bella, the Scotch nurse, who has been with the family many years and was the special favorite of the deceased preacher, the male nurse, Richard, S. V. White, E. A. Seccomb, one of the trustees of Plymouth Church, and Major J. B. Pond.

Several inducements were held out to Mr. Beecher to leave Plymouth Church, but in vain. In 1870 Mr. Beecher was editor in chief and a principal owner of the Christian Union, which was then rapidly increasing its circulation and influence. He had been formerly the editor of the Independent, a journal of similar character, the editorial chair of which he resigned in favor of Theodore Tilton.

What is known as the Beecher-Tilton scandal is still fresh in the mind of the newspaper reader. Mr. Beecher submitted the whole matter to the investigation of a committee consisting of some of the most eminent and respected members of his church and society. They reported unanimously after giving Mr. Tilton a full hearing, that the charge was entirely false, and this report was unanimously adopted by the church and congregation.

Mr. Beecher's four children are all grown up and married. His eldest son, Colonel Henry Barton Beecher, is a well-known insurance man in Brooklyn. Major William C. Beecher is a lawyer, and the youngest, Herbert Beecher, is collector of customs at Portland, Ore. His only daughter is married to a New England clergyman, Rev. Mr. Scoville. Mr. Beecher spent his winters at his country home at Peckskill, on the Hudson. Here his farm has one of the rarest and finest collections of trees and shrubs to be found on any private American domain.

Mr. Beecher stood without a rival as a pulpit orator; he was an ardent lover of nature in all her moods; his theology embraced and he was a wonderful social and political reformer; he chose to exercise his strength in these spheres; his style of oratory was dramatic, but never theatrical; his intuition was rapid and accurate; his analytic powers never took the direction of abstractions; he was intensely practical; his personal magnetism was large; illustrations by his own life and example were his chief weapons; he had the keenest sense of humor; in a word, he was a giant among the intellectual giants of his day.

Some time ago Mr. H. W. Sage, a member of Plymouth Church, appropriated by will a sum of money to place a statue of Mr. Beecher in Wood Park, after his decease. Mr. Quincy Wood, the well-known sculptor who is to do the work, will call at the house in the course of the day for the purpose of making a plaster cast of his features. It is not intended that any examination shall be made of Mr. Beecher's brain or organs.

Henry Ward Beecher, who two years ago, was pronounced by Gladstone one of the five truly great men living, the other four being, according to the grand old man, "Foster, Hays, Grant, Bismarck and Darwin," was born at Litchfield, Conn., June 24, 1813, the eighth child of Lyman and Roxana Foote Beecher. The convergence of two lines of sturdy New England ancestry is represented by the union of these names. Of his childhood period Mr. Beecher himself says in his characteristic way:

"I think I was about as well brought up as most children, because I was alone. My father was so busy, and my mother had so many other children to look after, that except here and there, I hardly came under the parental hand at all. I was brought up in a New England village, and a hardy, energetic cast of character was the result. The chestnut trees, where the chestnut trees were, where the sassafras trees were, where the squirrels were, where all those things were that boys enterprise after; therefore I had a world of things to do; and so I did not come much in contact with family government."

His mother died when he was but three years old. His devotion to her memory amounted to a passion in after years. In one sermon he said that no devout Catholic ever saw so much in the Virgin Mary as he had seen in his mother, who had been a presence to him ever since he could remember. He began his education in a little school kept by a Widow Kellown, where the strictness which generally prevailed was emphasized by the recital of the alphabet twice daily. From here he went to the district school.

At the age of ten he was removed to the private school of the Rev. Mr. Langdon, at Bethel, and was then sent to Hartford, where his sister was the head of a young ladies' school. There he was the only boy among the boys and girls. When he was twelve years old the family removed to Boston, and the whole current of his life was changed. He entered the Boston Latin School, where the course of study was repulsive and ungenial to him. He afterward said, in one of his sermons, that if he had not been taken out of Boston in nothing would have prevented his going to destruction. The boy, from reading books of travel, hankered after a life of adventure. Under the pretense that a training in mathematics and navigation was necessary, he was sent by his father to Mount Pleasant school, at Amhurst, Mass. There he was under the special care of a general, mainly young teacher, between whom and the boy a friendship was compacted. Under the instruction of this Mr. Fitzgerald he made good progress in mathematics, and the difficulties in his voice, its indistinctness and thickness, were removed in a great measure, by a course of elocution under Prof. J. E. Lovell. He joined his father's church in Boston, when his dreams of naval ambition were merged into aspirations to enter the ministry. Two years of happiness at Mt. Pleasant followed. His preparation was thorough, and he might have entered the Sophomore but he joined the Freshman's class. He graduated in 1834 and joined his father at Cincinnati, where Dr. Beecher removed some two years before.

Dr. Beecher entered the Lane Theological Seminary at Cincinnati, where he conceived a strong attachment for Prof. C. E. Stowe, afterward the husband of his sister, Harriet. Old Dr. Lyman was then a professor in the seminary. The theological views of Henry Ward at this time can be summed up in the following sentence: "The salvation of humanity by Divine agency, through the salvation of individuals, was to him the great end to be obtained, but the means to this end was a problem, the complexity of which rendered him, as he heard the close of his theological course, the victim of doubt and hesitation." After leaving college he received a call to Lawrenceburg, Ind. Thence he was called to Indianapolis where, with his wife, whom he had married before leaving Cincinnati, he lived a simple, wholesome life of the most intense activity. From Indianapolis, after eight years of happy ministry, he was called to Plymouth Church, in Brooklyn. He began his pastoral duties in Orange Street, Brooklyn, on Sunday morning, October 10, 1847.

The church to which Mr. Beecher had been called owed its origin to two facts. In 1846 there were but thirty-nine churches in Brooklyn, a city then of nearly sixty thousand inhabitants, and of these churches but one was Congregational. The need of more societies of this denomination was obvious, and was met by prompt action on the part of several prominent Christian gentlemen.

Reports of the popularity and renown of Mr. Beecher, of Indianapolis, had directed the earnest interest in the man and his preachings, and through the influence of his friend and advocate, Mr. William P. Cutler, of New York, Mr. Beecher, who was then in that city, was asked to preside at the opening of the new Congregational Church in Brooklyn, May 16, 1846. Beecher's discourse produced a deep and lasting impression upon his audience, and at a subsequent meeting in June, 1847, at which the name of Plymouth Church was adopted, he was elected unanimously by the society to the pastorate, and immediately invitation was given him to assume the position. In March, 1849, the pastor was taken by a severe illness, which confined him to the house for two months and disabled him from preaching until September, nor did he recover his full strength until the winter. In June, 1850, the society, of its own accord, gave him leave of absence to visit Europe, and he did not return until September. In 1856 the society, at the request of a number of eminent clergymen and others, voted him a leave of absence to traverse the country in behalf of the cause of Liberty, then felt to be in peril. In June, 1863, the society requested him to revisit Europe for his health, which he did, returning in November. With these exceptions the pastor has labored steadily at his post since 1847, at all times other than the regular summer vacation which lasts on the average six weeks.

Several inducements were held out to Mr. Beecher to leave Plymouth Church, but in vain. In 1870 Mr. Beecher was editor in chief and a principal owner of the Christian Union, which was then rapidly increasing its circulation and influence. He had been formerly the editor of the Independent, a journal of similar character, the editorial chair of which he resigned in favor of Theodore Tilton.

DEATH OF CAPTAIN EADS.

The Noted Engineer Passes Away While on a Visit to the Bahamas Islands in Search of Health—A Sketch of His Busy Career.

New York, March 11.—A dispatch from Nassau, N. P., via Key West, Fla., announces the death there on the 8th inst. of Captain James R. Eads, of pneumonia. Mrs. Thorne, an old friend of Mrs. Eads, said at the Eads house last night that no direct information of Captain Eads' death had been received by her, nor by any of his friends in this city. W. J. Harner, who has been associated in business with Captain Eads for many years, said that he received on Wednesday a letter from Mrs. Eads.

As yet neither homoeopathist nor allopathist is prepared with a cure for dropsy, but the world has long since recognized, and many medical gentlemen also recognize and prescribe Warner's safe cure for these derangements, and admit that it is the specific for the common and advanced forms of kidney disorders.

Formerly the true cause of death was discovered only after death. To-day the microscope shows us, in the water we pass, the dangerous condition of any organ in the body, thus enabling us to treat it promptly and escape premature death.

As yet neither homoeopathist nor allopathist is prepared with a cure for dropsy, but the world has long since recognized, and many medical gentlemen also recognize and prescribe Warner's safe cure for these derangements, and admit that it is the specific for the common and advanced forms of kidney disorders.

"ONLY AFTER DEATH."

What Wonders the Microscope Has Done For Us. No Longer Obligated to Die, to Find Out "What's Killing Us."

One of the leading scientific publications states that many people are now using the microscope to discover the real cause of disease in the system and to detect adulterations of food and medicines. This wonderful instrument has saved many a life. A microscopic test shows, for instance, the presence of albumen in the life of the blood, in certain derangements of the kidneys, but medicine does not tell us how far advanced the derangement is, or whether it shall prove fatal.

The microscope, however, gives us this knowledge: Bright's disease, which so many people dread, was not fully known until the microscope revealed its characteristics. It greatly aids the physician, skilled in its use, in determining how far disease has advanced, and gives a fuller idea of the true structure of the kidney.

A noted German scholar recently discovered that by the aid of the microscope, the physician can tell if there is a tumor forming in the system, and if certain appearances are given in the fluids passed it is proof positive that the tumor is to be a malignant one.

As yet neither homoeopathist nor allopathist is prepared with a cure for dropsy, but the world has long since recognized, and many medical gentlemen also recognize and prescribe Warner's safe cure for these derangements, and admit that it is the specific for the common and advanced forms of kidney disorders.

THE MAN WHO STEEPS TO BRUSH ORANGE-Peel from the sidewalk is bent on doing good.—Pittsburg.

"MARCH 1883." wrote G. C. Shays, 108 Prince street, N. Y. "Crippled with lumbago; I tried St. Jacobs Oil; it relieved; tried again, it cured me." November 1, 1882, he writes: "Confirm my statement; was completely cured." Price fifty cents.

Mrs. M. Pollock, 95 Aisquith Street, Baltimore, Md., says: "Red Star Cough Cure for colds, coughs and sore throat has no equal." Price twenty-five cents a bottle.

On the toboggan it is gravity that produces the levity.—Springfield Union.

Lives on tick—the man who eight o'clock.—Seminole Journal.

Posterity vs. Ancestry. It is no longer questioned, it is admitted, that the blood of man is improving. The children of to-day are better formed, have better muscles and richer minds than our ancestors. The cause of this fact is due more to the general use of Dr. Hartner's Iron Tonic than any other source.

Many men object to sitting in jury, and as warden, as jurymen always get into a box.

Hals's Honey of Horehound and Tar cures Coughs and bronchitis and consumption. Figs's Toothache Drops Cure in one minute.

The lobster lays twelve thousand eggs a year. Go to the lobster, thou hast!

COUGHS, BROWN'S BRONCHIAL TONIC are its advantage to alleviate COUGHS, Sore Throat, and Bronchial Affections.

A RECEIVING teller—the newspaper interviewer.—Boston Transcript.

If a cough disturbs your sleep, take Piso's Cure for Consumption and rest well.

This language the telephone speaks is broken English.

For Weak Women. Mrs. Lydia E. Pinkham, Lynn, Mass.: "About the first of September, 1881, my wife was taken with uterine hemorrhage. The best physician she could procure did not check it and she got more and more enfeebled. She was troubled with Prolapsus Uteri, Leucorrhoea, numbness of the limbs, sickness of the stomach and loss of appetite. I purchased a trial bottle of your Vegetable Compound. She said she could discover a salutary effect from the first dose. Now she is comparatively free from the Prolapsus, Stomach's sickness, etc. The hemorrhage is very much better and is less at the regular periods. Her appetite is restored, and her general health and strength are much improved. We feel that we have been wonderfully benefited and our hearts are drawn out in gratitude for the same and in sympathy for other sufferers, for whose sakes we allow our names to be used." C. W. EATON, Thurston, N. Y.

The Compound is put up in Pill, Lozenge and Liquid form. All sold by druggists. The Pills and Lozenges sent by mail on receipt of price.

Teachers of Juvenile Singing Classes do not need to look for the latest and best songs. The following are new, bright, pretty and easily given. Commence to sing these.

VOICES OF NATURE. Opera, N. B. BARBERT. FOREST JUBILEE BAND. N. B. BARBERT.

NEW FLORA'S FESTIVAL. Edited by J. C. Johnson. BRADFORD. MERRY COMPANY. OF CADETS' PICNIC. COLLIER.

Price of each book, 25 cts., or 50 cts. per doz. The first two books are by a nature and musical composer, who fills them with very sweet songs of birds, flowers, insects, etc. Flora's Festival, doubled in size and with various directions, will surely be a success, as well, in another way, as the "MERRY COMPANY."

Our new edition of VOICES OF NATURE, 100 cts. per doz. by Rev. C. L. Hatfield, is specially recommended to all who wish a Sunday School Song Book of the highest character. Sent, Academic and Seminary are always sold in adopting the carefully compiled School Song Books of Dutton & Co. We are proud to issue this higher school, SONGS & RECITATIONS (10 cts.) and ROYAL SINGER (10 cts.), for grammar schools, GEMS FOR LITTLE SINGERS (50 cts.).

"WHAT is the best way to manage a man?" asks a feminine correspondent. "Marry him."—Omaha World.

The scalp is cleansed and excited to a healthy action by Hall's Hair Restorer. In consumption, the disposition to cough is diminished by taking Ayer's Cherry Pectoral.
